Tplay
AROUND YOU

Materials and components

At Vinci Play, we believe that every detail matters, which is why we use the highest quality materials and components with certificates and approvals to produce our devices, collaborating with world-famous suppliers. Thanks to this we can obtain a final product that will be not only aesthetic and functional, but also safe and compliant with applicable standards.

Wood

Laminated wood with a cross-section of 90 x 90 mm. Top quality first-class wood: without knots, uniform colour, straight grain. Sanded, impregnated and varnished in a multi-stage production process. Secured from above with durable plastic overlays, and from below with hot-dip galvanised steel anchors, which protect the wood from direct contact with the ground, and thus prevent the development of rot and extend its life.

Robinia wood

Robinia - black locust is the most durable wood found in Europe. It is characterised by a light, warm colour. It contains many oils that very well protect the material against weather conditions, naturally preserving, protecting against rotting processes and pests. It is distinguished by its exceptional hardness, resistance to moisture when in contact with soil. When sourcing wood, we make sure that it comes from European forests with the FSC® certificate and other controlled sources.

Stainless steel

A structure made of AISI 304 or 316 stainless steel with an appropriately smooth surface finish is completely resistant to weather conditions, which ensures long service life. It is used to produce playground equipment, slides, tube slides, fasteners and chains.

Steel

- A steel construction of components is made of profiles with different cross-sections. Those steel components are galvanized before applying powder coating, in two options:
- hot-dip galvanizing powder coated with UV-resistant paints with a QUALICOAT certificate,
- powder galvanizing powder coated with UV-resistant paints with a QUALICOAT certificate.

Recycled composite

A structure made of composite, an ecological and innovative material derived 100% from recycled consumer waste, mainly clothing. This material is as durable as steel, does not absorb water, does not corrode or rot. It is also resistant to UV radiation.

HEXA platforms

Platforms and climbing walls made of anti-slip and waterproof HPL board or optionally cross-plywood. They are covered with a phenolic film with a honeycomb imprint surface pressed hot, providing increased resistance to abrasion, mechanical damage and chemicals. They are PEFC certified.

Recycled HDPE

High-quality polyethylene made 100% from recycled waste, including ocean waste such as fishing nets and ropes. Highly durable, environmentally friendly material, resistant to weather conditions: frost, moisture, temperature fluctuations, UV radiation. Used for the production of various types of panels, covers, roofs and other playground components. Available in green.

HDPE

HDPE is a high-density polyethylene, resistant to weather conditions, such as moisture, frost and UV radiation. Three-layer boards with a black filling made of 100% recycled re-granulate are used to produce panels, roofs and other playground components.

HPL

HPL is a duroplastic pressure laminate. Cured polyurethane-acrylic resins create a highly resistant top layer, which makes the boards resistant to chemical and biological factors, UV radiation and changing weather conditions. This laminate is used to produce covers, panels, roofs and other playground components. It has a PEFC certificate.

Polycarbonate with print

Polycarbonate is a very durable material, with a transparency similar to glass, and at the same time twice as light and two hundred times more impact resistant. Additionally, it is resistant to weather conditions, including UV radiation and temperatures in a wide range. We use it to produce panels, covers and 3D spherical windows (portholes). Some elements are covered with a very durable double-sided print, also resistant to weather conditions.

Ropes

16 mm diameter galvanized steel ropes covered with polypropylene or nylon material, connected with plastic, stainless steel or aluminum, resistant to UV radiation, abrasion and rot.

Slides

Slides made of AISI 304 stainless steel, resistant to vandalism and external environment. Also available in fiberglass option. Side covers of the slide made of HDPE or HPL boards resistant to weather conditions, including frost and UV radiation.

Stainless steel slides

Slides made of AISI 304 stainless steel, resistant to vandalism and external factors. Made with attention to every detail, with the highest quality welds, they are an elegant finish for playground products.

Tube slides

Slides made of certified AISI 304 and AISI 316 stainless steel. Sheet thickness: 2.5 mm, diameter of 79 cm, sanded surface. The length of the slide exit depends on the length of the slide itself, the exit cap is made of a pipe with a diameter of 33.7 mm. Available variants: straight, curved or spiral (360 degrees). The tube slides meet the EN 1176 Standard.

PE tube slides

Straight, curved or spiral slides made of colorful, impact- and scratch-resistant polyethylene (PE). The internal diameter is approx. 75 cm. Available in various vivid colors and in different heights.

Moving elements

Moving elements in the Fitness series are based on two solutions: a Swiss joint system - safe and durable, allowing for fully guided movement, resistant to overloads, weather conditions and vandalism, with mechanical stopping and a durable bearing system enclosed in a housing, thanks to which it does not require lubrication and maintenance. These parts ensure long service life of devices with moving elements.

PP tunnels

Double-walled tunnels resistant to distortion, made of PP (diameter 500 or 600 mm). Resistant to wear, vandalism and external factors.

Climbing stones

Colourful climbing stones made of durable composite resin with mineral fillers, resistant to abrasion and UV radiation.

Anchors

In wooden products, we use anchors made of hot-dip galvanized steel, protecting the wood from direct contact with the ground, which prevents the development of rot, thus extending the life of wooden products and ensuring their long-term use.

Chains

Certified chains made of AISI 304 and AISI 316 stainless steel. Calibrated to protect fingers from getting pinched. Safety plugs Rubber or polypropylene safety plugs protect steel profiles from weather conditions and protect children from injuries.

Protective plugs

Rubber or polypropylene protective plugs protect the main construction profiles against weather conditions and children from injuries.

Screws

Screws made of AISI 304 and AISI 316 stainless steel or galvanized and secured with durable polyamide caps, protecting against contact with the external environment. Thanks to this, our devices are resistant to wear and tear or changing weather conditions.

Colours

Different colours of play panels, ropes or construction elements allow our products to fit into various environments. Vinci Play products are aesthetic solutions tailored to the customer's expectations. When choosing colours, we pay special attention to functionality, the visual aspect, and matching the product to users' needs.

**Be more eco
with Vinci Play!**

Recycled, a better way!

Caring for the future of children and future generations, the idea was born to replace our classic elements of play equipment construction with post-consumer recycled materials. As a result, we have created a group of Recycled products based in 100% on recyclable materials that lower carbon emission.

Towers, slides, ladders, sandboxes, educational panels, spring rockers, swings and complementary elements, such as benches and litter bins - all produced with the use of recyclable materials.

**LOW CO₂
EMISSION**

Composite posts

Recycled posts made of an innovative material made of used clothing and foil. The characteristics include, among others that this material: does not corrode, is durable as steel, resistant to algae formation, does not absorb water and is resistant to UV radiation.

Recycled HDPE panels

Roofs, side panels and moving elements manufactured from ocean waste – fishing ropes and nets. With high durability and resistance to weather conditions these panels allow to create a playground with almost 100% recycled elements, contributing to a healthier environment for future generations.

Plywood platforms

Anti-slip and waterproof platforms and climbing walls made of plywood coated with a hot-pressed phenolic film with a honeycomb surface imprint – it offers increased resistance to abrasion, mechanical damage and chemical agents. It is PEFC-certified.

HDPE with recycled core

A high-quality material resistant to atmospheric agents, i.e. it is waterproof, resistant to frost, UV radiation or moisture. We use three-layer plates (a black core is made of 100% recycled granulate) for the production of various panels, roofs and other playground components.

Stainless steel bars

AISI304 or AISI316 stainless steel bars are used as handrails, fireman's poles, climbing frames, ladders. With a smooth surface, it is completely weather-resistant, thus ensuring its long life span.

HPL elements

HPL panels are being used as supplement in various types of equipment, harmonising with recycled style of the series. This laminate is resistant to chemical and biological factors and weather conditions.

wooden recycled

Wooden now in Recycled option!

The WOODEN series now available in a new material version. Instead of painted wood construction, products are available in the Recycled option.

Various educational and sensory panels combined with moving elements will bring children a lot of joy and arouse great interest.

The environmentally friendly Recycled series devices stimulate the child's comprehensive physical development and also allow a large group of children to play together. Thanks to this, the child learns to establish relationships with peers and cooperate in a group.

solo • recycled

Fun for the youngest!

The SOLO series is a paradise for preschoolers, ruled by sand, water, sound and movement.

Free fun develops natural creativity, encourages experimentation and unleashes imagination and the desire to cooperate with other children.

Numerous manual and sound elements and educational panels stimulate the senses in a comprehensive way, stimulating the child's intellectual development.

climboo recycled

Climb, crawl and pull-up

The CLIMBOO series develops the skills and coordination of older children, increasing their self-confidence.

Various ladders and climbing walls of varying degrees of difficulty strengthen muscles and teach the child to concentrate and maintain balance.

This series is an ideal place to organize games with elements of competition, where exciting physical challenges are accompanied by maximum safety.

spring recycled

Rocking and swaying

The SPRING series is pure energy on springs. It satisfies a child's natural need for free and carefree swinging.

Various vehicles and cheerful animals on springs encourage toddlers to energetically jump and swing in rhythm with body movements.

Spring riders and rockers, loved by children, allow for joyful play, which also brings huge benefits for their psychomotor development.

hoop recycled

Spin, spin!

The HOOP series consists of carousels and spinners that power the world of laughing children.

Spinning is an important activity in a child's development - it helps the nervous system mature, stimulates the sense of balance, strengthens the muscles and skeletal system.

park-recycled

Small park architecture

The PARK series is an essential addition to a child-friendly playground.

Comfortable benches and tables, waste bins, information boards and fences provide comfortable rest for children and their parents and guardians.

The modern and aesthetic design of small architecture harmoniously matches the playground equipment.

with Vinci Play!**

Robinia, naturally!

The ROBINIA series is an inexhaustible source of inspiration for play for younger and older children. The variety of educational and sensory panels, as well as moving elements, stimulate in children great interest and joy.

The environmentally friendly, wooden devices in the ROBINIA series stimulate the comprehensive physical development of a child and allow a large group of children to play at the same time. Thanks to this, the child learns to establish relationships with peers, and cooperate in a group.

Over 150 playground-equipment, sports, and small architecture products fit perfectly into both the natural landscape and modern architecture.

SEE ROBINIA CATALOGUE!

Robinia wood

The acacia wood used in the production of the Robinia series contains many oils which protect the material very well against weather conditions, naturally preserving it against rotting processes and pests. By obtaining wood, we are sure that it comes from European plantations with FSC® certification and other controlled sources, thanks to which we care for the future in the spirit of sustainable development.

Safety standards

In order to maintain the unique and irregular nature of the acacia wood, each product is individually prepared in accordance with the safety standards. In the Robinia series, we have developed unique technical solutions ensuring compliance with the EN 1176 safety standard. The products are certified by the international certifying institution TÜV SÜD and TÜV Rheinland. In addition, our production plants undergo periodic control audits by independent certification bodies.

Safe finish

Thanks to the processing of wood by sanding, we smooth its surface, erasing any rough edges or unevenness, so we make the product not only aesthetic but also safe.

Polycarbonate

Our devices are enriched with components made of transparent polycarbonate, which is an excellent alternative to glass. Twice lighter and at the same time two hundred times more resistant to impacts, this material is perfect as a functional and aesthetic detail in devices for playgrounds. Additionally, it is resistant to UV rays, weather conditions and temperatures in a wide range.

Stainless steel

Gutters, troughs and bathtubs made of AISI 304 or AISI 316 stainless steel with a suitably smooth surface finish allow children to play in water and sand. With proper maintenance, stainless steel remains unaffected by weather conditions, which ensures its long service life.

Surface anchoring in Robinia

For most Robinia equipment, anchoring to concrete (K3 surface anchoring) is available, where Robinia logs are put on hot-dip galvanized anchors. A solid solution allows the installation of products of this series in various environments, adapting to various projects.

Quick and easy installation

Before shipment, all products undergo preliminary assembly in our factory to prevent jams. We have developed a special connection system, consisting of appropriate undercutting, specialised fastening, and machining holes in key places. Thanks to the clear instructions and the individual marking of the components, it is possible to install quickly and easily, without specialist knowledge and tools.

Packing and transportation

All elements are manufactured in such a way, that it is possible to transport both by road (by bus, or semi-trailer), or by sea or air. The appropriate packing of the elements optimises space and transport costs, and facilitates convenient unloading without the need for cranes or specialist equipment.

Robinia

Destination: nature!

The ROBINIA series consists of playground equipment made of natural raw material - Robinia acacia wood, the most durable wood found in Europe. This timber is characterized by natural, bright colours, has high weather resistance, does not require impregnation and can be anchored directly in the ground.

The unique Robinia series has been designed in a comprehensive way to enable creating of an offer containing all types of playground equipment: from tower sets with many climbing elements, through spring riders, carousels and swings, to small architecture.

Characteristics of the ROBINIA series:

Robinia wood construction

Stainless steel elements

HPL panels

Stainless steel slides

Ropes with steel core

Polycarbonate (PC) panels

Durable connectors

**Get higher
with Vinci Play!**

Let's play in the sky!

Tall conical and cubic towers reaching to the sky are a paradise for children. Made of the highest quality materials, with a beautiful design, enriched with educational elements and musical panels, as well as stainless steel tube slides. Thanks to the modular system, they can be the whole playground themselves or be its main advantage.

Construction

Steel construction of high modular tower equipment is made of sturdy profiles hot-dip galvanised and powder coated with UV-resistant paints holding the QUALICOAT certificate available in a great variety of colours. Our products are aesthetically pleasing and prepared with great care to obtain highest quality design requirements.

Modular system

High tower sets can consist of many different configurations. They are available with different height options, can be made of single elements, or connected by steel passages or bridges. This makes them flexible to fit any project.

Educational panels

Various educational elements made of the highest quality HPL panels make the playground more attractive, creating an interesting place not only for teenagers but also for younger children.

Design by Vinci Play

Side walls of tower sets can be made of very durable material, resistant to weather conditions, including UV rays and a wide range of temperatures. Covered with cheerful graphics created from scratch by a team of creative graphic artists, it allows to customize the appearance of any playground.

Openwork steel passages

Passages made of thick stainless wire create openwork spiral passages connecting individual parts of equipment. This makes the structure look lighter and allows children to play with a bit of a thrill.

Musical panels

To make it even more fun our products can be boosted by musical elements made of the highest quality stainless steel and colorful talking tubes.

Activity elements

Inside the cubes and cones, there are many activity ladders, nets, and bridges, made of galvanised steel ropes in polypropylene braid, linked with durable fasteners. The rope elements are processed using hydraulic presses with a pressure of 150 tons. These rope nets are a real challenge for children, thus supporting their psycho-motor development.

Stainless steel tube slides

Slides made of certified AISI 304 and AISI 316 stainless steel with 790mm diameter, sanded surface. Available variants: straight, curved or spiral depending on the design. The entire production process of stainless-steel tube slides is performed by highly-qualified Vinci Play employees. They design the tubes, then roll them with high precision, match all the elements of the device, and finally, connect the components using durable and secure welds.

maxx

Higher, higher, higher!

The MAXX series are amazing towers that impress with their size and encourage physical activity.

These products reach up to 9 meters in height, creating some of the most impressive play structures.

The devices enable integration with other children during social play. Climbing on them is an amazing adventure, and the twisted tube slides additionally diversify the fun.

jungle

Wild adventure!

The JUNGLE series will allow you to climb to the heights and conquer the unconquered.

High, up to 9,5 meters above the ground, the greatest adventures will take place like in the crown of trees! Among green leaves, branches and colourful cheerful graphics, everyone will be able to turn into a traveler and explorer.

High tube slides are really fun - not only for small kids, and the climbing elements are a challenge and encouragement to be active.

space

Explore the universe!

The SPACE series is a fulfillment of childhood dreams of space travel.

The towers up to 9,5 meters high, like space rockets, will lift children high above the ground. Colourful graphics, lots of activity and play elements, including tube slides made of the highest quality stainless steel, will not let you get bored.

topicco

Play a role!

A series of role-playing devices: a train station, a fire station, a fire truck, a lighthouse, a ship, a truck or a roller. These devices release a child's natural tendency to play happily and learn the "adult world" as well as engage in teamwork training.

The TOPICCO series offers a number of elements such as educational panels or manual elements that stimulate motor skills and positively affect the intellectual development of young children.

wooden

Equipment from painted wood

The WOODEN series is an endless source of inspiration for both younger and older children how to have fun.

Various educational and sensory panels, coupled with moving elements, will bring children lots of joy and draw a lot of interest.

The environmentally friendly wooden equipment from this series stimulates the child's comprehensive physical development and also allows a large group of kids to play together at the same time. Thanks to this, child learns how to establish relationships with their fellows and how to work as part of a team.

Characteristics of the WOODEN series:

Wood construction

Galvanised anchors

HPL HEXA platforms

HDPE panels

Polycarbonate (PC) panels

Stainless steel elements

Stainless steel slides

Durable connectors

Ropes with steel core

Protective tops

PP tunnels

PE tube slides

Colour & material options*:

Colour (panels):

- C1 HPL - RAL6000
- C2 HPL - RAL3000
- C11E HDPE - multicolour
- C3 HPL - RAL5024
- C9 HPL - wood pattern

Platforms:

- HEXA HPL
- HEXA plywood

Slides:

- Stainless steel
- Fiberglass

Anchoring:

- Surface
- Deep

*Material options apply to selected products, for more information visit: www.vinci-play.com

solo.

New!

Fun for youngsters!

The SOLO series is a paradise for preschoolers, which is ruled by sand, water, sound and movement.

Free fun develops natural creativity of the child, encourages to do experiments and triggers the desire to cooperate with other children.

The richness of colours, manual and sound elements, along with educational panels: all these elements comprehensively stimulate the senses and the intellectual development of child.

Characteristics of the SOLO series:

Stainless steel construction or elements

Galvanised steel construction or elements

Wood construction

Galvanised anchors

HPL HEXA platforms

HDPE panels

Polycarbonate (PC) panels

Stainless steel slides

Durable connectors

Ropes with steel core

Protective tops

PP tunnels

Colour & material options*:

Colour (panels):

- C11E HDPE - multicolour
- HDPE RAL6024 / ● HPL RAL6000
- HDPE RAL5015 / ● HPL RAL5024
- C12E HDPE - grey/black
- HDPE RAL3020 / ● HPL RAL3000
- HDPE RAL8024 / ● HPL wood pattern

Construction:

- Painted steel
- Stainless steel

Platforms:

- HEXA HPL
- HEXA plywood

Slides:

- Stainless steel
- Fiberglass

Anchoring:

minisweet

Colourful series for the youngest

The MINISWEET series consists of playground equipment designed for the youngest children and preschoolers.

Friendly houses, tunnels and slides are an ideal place to have fun together. This is also where the child learns the principles of functioning in a group while perfecting its language skills.

Minisweet devices encourage children to exercise and support the development of key mobility aptitudes. They allow every toddler to enjoy joyful and carefree fun.

steel!

Classic tower sets

The STEEL series consists of classic structures that offer unlimited fun for older children. The sets of equipment from this series can be perfectly adapted to the needs of children and the available space.

Rows of towers connected by various attractive movable elements make for a great training ground for motor coordination. They allow a large group of children to play together at the same time, which helps to establish relationships and also teaches teamwork as well as healthy competition.

Unique houses

The CROOC series is all about beautiful, unique designs, vibrant colours and multi-tower playground sets that allow large group to have fun together.

Fairytale houses encourage children to engage in role-playing activities with their fellows. Element merging platforms, ladders, climbing walls and slides of different difficulty levels comprehensively stimulate the proper motor development of each child.

This series guarantees that the child's energy is channeled effectively.

climbo

Climb, crawl and pull-up

The CLIMBOO series comprises equipment that develops the fitness and coordination of older children, increasing their faith in their own abilities.

Various climbing ladders and walls with a varying level of difficulty strengthen the muscles and teach the child to concentrate and maintain balance.

This series is the perfect place to organise competitive games where exciting physical challenges are coupled with maximum safety.

Characteristics of the CLIMBOO series:

Stainless steel construction or elements

Galvanised steel construction or elements

Wood construction

Galvanised anchors

HPL HEXA platforms

HDPE panels

Durable connectors

Ropes with steel core

Protective tops

PP tunnels

Colour & material options*:

Colour (elements):

- C11E HDPE - multicolour
- C1 HPL - RAL6000
- C3 HPL - RAL5024
- C12E HDPE - grey/black
- C2 HPL - RAL3000
- C9 HPL - wood pattern
- CASTILLO
- JUNGLE
- SPACE

Colour (ropes):

- L5 - blue
- L6 - black
- L7 - red
- L8 - beige

Platforms:

- HEXA HPL
- HEXA plywood

Anchoring:

- Surface
- Deep

nettix^o

Ropes, ladders and spinners

The NETTIX series comprises modern equipment in the form of ladders and rope crossings, which constitute a combination of carefree fun and effective fitness training.

Rope climbing stimulates the sense of balance, strengthens the muscles and improves the child's dexterity. It also encourages children to compete with each other.

This series is a creative adventure among ropes, where the boundaries are set only by the children's imagination.

spring

New!

Rocking and swaying

The SPRING series equals pure energy on springs. It satisfies the child's natural need for unrestrained and carefree swinging.

Colourful vehicles and happy animals encourage kids to jump energetically and sway in the rhythm of body movements.

The spring riders, which are so beloved by children, allow for joyful fun which also carries great benefits for kids' development.

swing

New!

Swinging in full swing!

The SWING series includes classic equipment beloved by younger and older children.

Colourful single swings, see-saw swings, multi-swings with bird's nest seats and weight-balanced multi-swings offer a pleasant thrill for children and encourage them to play with their friends.

Rhythmic swing movement is an effective body balancing exercise that has a positive effect on the development of the muscular and nervous system.

hoop

New!

Spin, spin!

The HOOP series consists of roundabouts and spinners which drive the world of laughing children.

Spinning is an important activity for the child's development as it promotes the maturation of the nervous system, stimulates the sense of balance, strengthens the muscles and the skeletal system. At the same time it is a source of exciting sensations. For an older child, it is often a favourite place of crazy fun with friends.

Colourful carousels encourage both younger and older children to have fun together.

arena

Be like Lewy!

The ARENA is a multifunctional playing field that can be an independent sports facility, perfectly suited for public spaces. In the Arena you can play football, basketball, handball, hockey, tennis and many more.

The highest quality construction and materials are resistant to the loads associated with the use of the field. Thanks to the modularity of the size and functional design, as well as the possibility to choose the material and colour version, the Arena can be adapted to individual needs.

MODULAR SYSTEM

1. Determine the size of the Arena

Using modular side panels, an Arena of any size can be created. The corners, depending on the needs, can have a right angle or be cut (set at an angle).

2. Choose the design and material options

The structure of the Arena can be secured with a durable hot-dip galvanized coating, or galvanized and additionally secured with a three-layer paint.

Steel modular panels from which we create the Arena come in three options:

- vertical steel tubular profiles permanently welded to the frame, creating a durable, stable structure;
- walls made of HDPE board, resistant to weather conditions, reinforced with steel profiles;
- vertical rails made of recycled composite, resistant to moisture and low temperatures.

3. Set the height

Thanks to the modular panels, the height of the side walls can be freely adjusted to individual needs. Each panel is 1 m high. The durable safety net is available in the height of 2 or 3 m.

There are five combinations to choose from:

- one row of panels;
- two rows of panels;
- three rows of panels;
- two rows of panels + 3 m safety net;
- three rows of panels + 2 m safety net.

4. Select the entrance type

The type of entrance to the Arena can be adjusted to suit any needs. Five types are available: a panel with an opening, an openable wicket with or without additional blockade against the entry of bicycles, an offset panel or a lockable technical entrance.

MODULAR SYSTEM

7. Choice of complementary elements:

Additional elements of Arena equipment are designed so that they can be placed anywhere in the walls of the playing field. Four elements to choose from:

- stand-up bench;
- a small "Brazilian" gate;
- free-standing basketball basket;
- volleyball net.

5. Select football goals

- Football goals come in four configurations:
- without top panel;
 - with top panel;
 - with top panel and the basketball basket on the front;
 - with top panel and two basketball baskets: front and rear.

6. Pick side elements in the goals

- The side walls of the goals come in three variants:
- open;
 - with a crossbar to prevent the bicycle from entering the field;
 - completely closed (full goal).

Let's create a dog zone!

The WOOF series are devices for dogs, allowing them to develop and facilitate socialization with other furry friends.

These devices are ideal for starting agility training with your pet. Activity on devices from the WOOF series engages the dog both physically and mentally, contributing to improving its agility and coordination. Our products for dogs significantly affect their quality of life, while enriching urban infrastructure.

- park -

Small park architecture

The PARK series is a necessary complement to a kid-friendly playground.

Comfortable benches and tables, colourful litter bins, information boards and fences – all these elements ensure comfortable relaxation for children, their parents and caregivers.

The modern and aesthetically pleasing design of street furniture harmoniously blends in with the playground equipment.

Characteristics of the PARK series:

- Galvanised steel construction
- Wood construction
- Galvanised anchors
- HDPE panels
- HPL panels
- UV printed dibond

Colour & material options*:

- Colour (panels):
 - C1 HPL - RAL6000
 - C2 HPL - RAL3000
 - C3 HPL - RAL5024
 - C6 HPL - RAL1017
 - C9 HPL - wood pattern
 - C12 HPL - RAL7038
 - C11E HDPE - multicolour
 - C12E HDPE - grey/black
- Construction:
 - Painted steel
 - Stainless steel
 - Robinia wood
- Anchoring:
 - Surface
 - Deep

*Material options apply to selected products, for more information visit: www.vinci-play.com

Legend

Colour variants

Facilitated access for children with disabilities

100% recycled HDPE

Reinforced belt fabric

Carousel platforms made of HPL

Polycarbonate (PC) panels

Composite panels

Composite posts

Steel construction and/or elements made of hot-dip galvanised and powder coated steel

HPL - the highest quality, water and UV resistant high pressure laminated panels or elements

Connectors, screws, washers and nuts made of stainless steel and/or galvanised steel protected with plastic caps

Polypropylene (PP) or Nylon combination ropes with steel core

Stainless steel (AISI 304 or 316)
- stainless steel structure
- stainless handrails and rods

Anchoring options:
- deep to the ground – 55 cm
- to concrete with plates – 5 cm
- to concrete with plates – 55 cm

Rubber / PP protective tops

Spinning elements

HDPE - high density polyethylene panels or elements

Stainless steel or PE tube slides

Climbing stones

Attested stainless steel chains

UV printed PC or dibond panels

Construction made of impregnated laminated wood, post dimensions: 90 x 90 mm

Steel spring 20 mm, sand-blasted, iron phosphated and double powder coated

Stainless steel or fiberglass slides with side panels made of HDPE or HPL

Tunnels made of durable, vandal-proof, double-layered material

Certified swing seats:
- Flat seats of rubber compound with aluminium insert
- Toddler seats for small children with soft gripping

Platforms and climbing walls made from anti-slip and waterproof plywood or HPL HEXA panels – effective protection against environmental factors and wear-resistant
